Vision for the IMD Experiment Series

Joint Warfighter Support (TRJ)

Merge BPex, GMDSim, Combatant Command Exercises and IMD Experiments into a single integrated series of two annual events that meet the combined exercise and analysis needs of core operations, development, and acquisition customers.

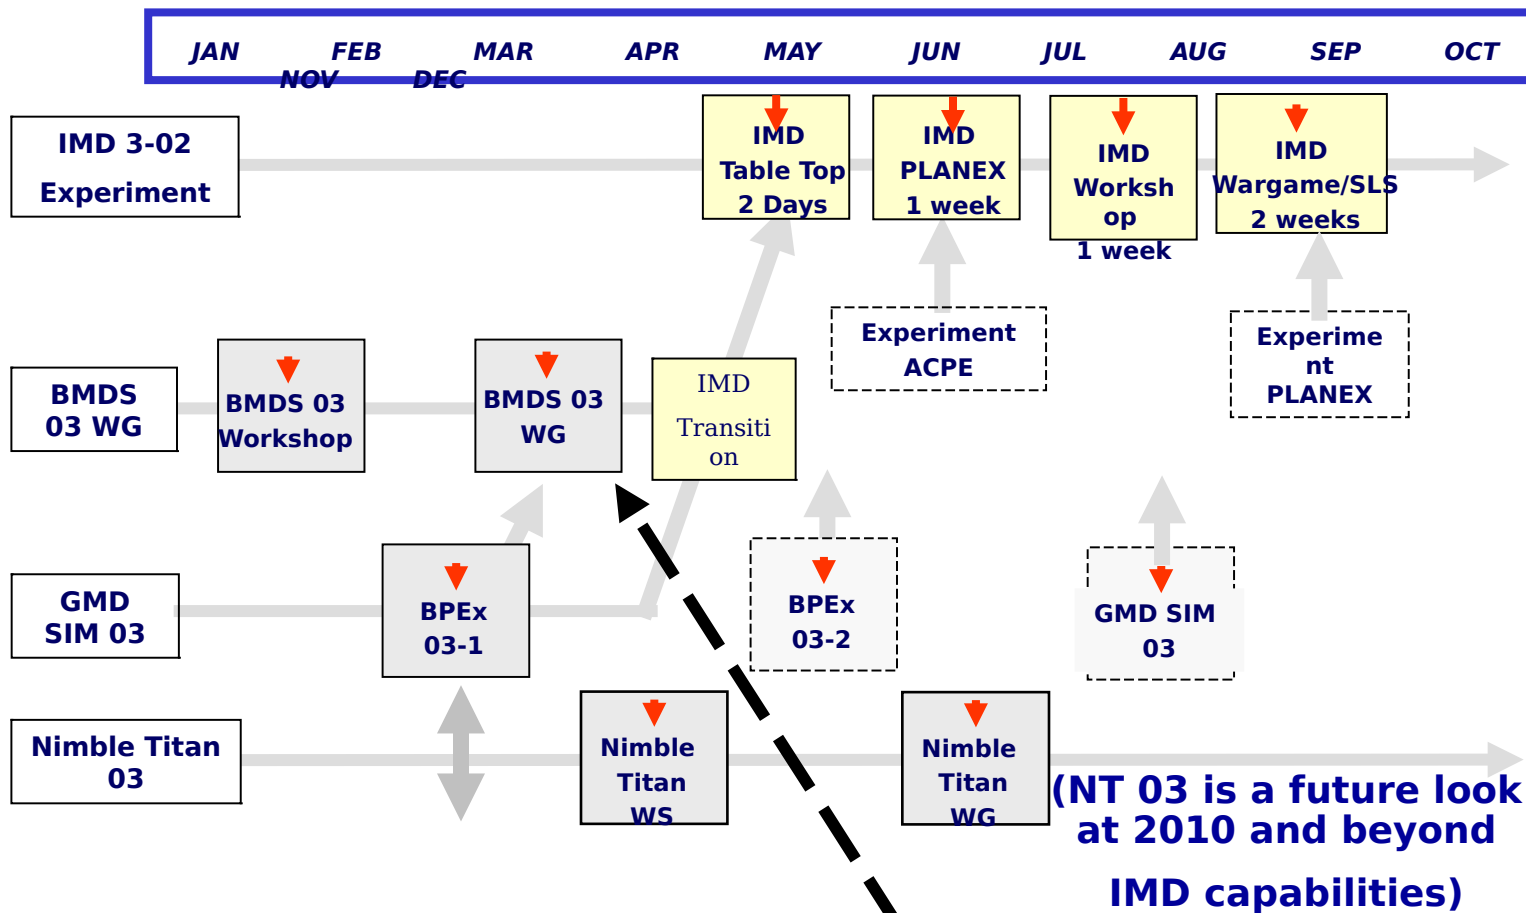

- Engage STRATCOM, NORTHCOM, PACOM, EUCOM, CENTCOM and JTCOM as partners of IDO
- Develop Combined goals and objectives for each Experiment Series. Maintained this focus through all events of the Experiment. Align scenarios and CONOPS where possible to support IDO related objectives

IMD 3-02 Goals and Objectives

Joint Warfighter Support (TRJ)

Combined Experiment Goals

- Experiment with the STRATCOM Global Ballistic Missile Defense CONOPS in a NEA scenario, expanding on Lessons Learned from previous events to provide insights to STRATCOM and other combatant commands on the processes needed to execute IMD
- Investigate distributed planning functionalities in support of IMD planning and force integration to infuse warfighter requirements into C2BMC Spiral 4.3 development
- Support STRATCOM and Element development of TTP, SOP and system development requirements needed for planning and integration of IMD

FOR OFFICIAL USE ONLY

Hypothesis for IMD 3-02

Joint Warfighter Support (TRJ)

Observation: Commander Strategic Command (CDR STRATCOM) is developing a Global Ballistic Missile Defense CONOPS. This CONOPS provides the foundation for the development of an Operational Concept and Architecture for Integrated Missile Defense (IMD). Starting with September 2004, the Missile Defense Agency (MDA) will stand up the Ballistic Missile Defense System Block 2004 Initial Defense Operations (IDO). Elements of the IDO will have the ability to transition to a combat status via the Emergency Activation Plan (EAP) against a limited ballistic missile threat. The IDO will require extensive vertical and horizontal C2 and planning integration between STRATCOM (as the lead for planning IMD) and other Combatant Command infrastructures via the C2BMC. All pillars of BMD planning and execution to include offensive operations and C2ISR planning. Additionally, the elements of the IDO must be trained, Mission Ready, and logistically supportable; able to support Combatant Command requirements.

Problem Definition: In SEPT 2004 IDO will be fielded. Using the STRATCOM GBMD and Combatant Command CONOPS, warfighters will plan and employ the IDO using the C2BMC as primary planning tool. Additional IDO Element TTP development will take place using distributed simulations and communications. Do the envisioned processes and prototype capabilities meet the vertical and horizontal IMD functional needs for execution of the IDO from the Combatant Command perspective?

Hypothesis: IDO as employed using the STRATCOM GBMD CONOPS, supported by C2BMC, and associated command and control capabilities, MEETS Combatant Command requirements for employment and management.

Null Hypothesis: IDO as employed using the STRATCOM GBMD CONOPS, supported by C2BMC, and associated command and control capabilities, DOES NOT MEET Combatant Command requirements for employment and management.

IMD 3-02 Schedule

Joint Warfighter Support (TRJ)

<u>Event</u>	<u>Dates</u>	<u>Location</u>
CDC	11-13 Mar	JNIC (AADC-1)
Scenario IPR	08-10 Apr	WDC
WG IPT IPR	17 Apr	VTC
IPC/MSEL	22-25 Apr	JNIC
TT/MPC (AADC-2)	19-23 May	JNIC
PLANEX	23-27 Jun	JNIC (AADC-2)
FPC	21-25 Jul	JNIC
Work Shop	08-12 Sep	JNIC (AADC-2)
TACEX	15-19 Sep	JNIC
WG Training	27-31 Oct	JNIC

JNIC's AADC suite to be installed in July or Aug
And is expected to be used for operational planning
And operations C2 situational awareness in the Sep. Workshop and the Nov. Wargame.
Need 2 personnel EACH at TT / Workshop and Wargame events.

Table Top Expectations/Products

Joint Warfighter Support (TRJ)

- Obtain common understanding of BMDS IDO capability in 2004
- Support Combatant Commander CONOPs/CONPLAN development activities
- Surface critical issues to be addressed in near term events (e.g. PLANEXs, WGs, Exercises) and development activities
- Provide warfighter desired capabilities for future development activities

WARGAME

FOR OFFICIAL USE ONLY

FOR OFFICIAL USE ONLY

Workshop

Joint Warfighter Support (TRJ)

- One week End to End test of simulations, connectivity and communications
 - Provides a final check of the systems to ensure fully mission capable.
 - Multiple TTP runs will be execute to test out system
 - Scenario and PLANEX guidance integrated into event to ensure comonality with other events
- Leveraged Training
 - GMD Crews leverage off test runs to man positions and conduct crew certification and TTP development.
 - Minimal outside participation to event. C2 manning limited to 1 person response cell manning
 - End ot End testing take priority to crew training

FOR OFFICIAL USE ONLY

Wargame Construct

Joint Warfighter Support (TRJ)

- Two Week Event (Preceded by Training Week)
 - Senior Leadership Seminar provides opportunity for discussion of critical GBMD issues and to present the plan as developed at the PLANEX
 - Engagement of senior leaders
 - 3 days of integrated C2/BM runs
 - Scenario and PLANEX integration, combined with positional training meets STRATCOM goals
 - Two daily TTP runs first week and multiple TTP runs in week two address Element warfighter and developer goals
- Issues
 - C2BM Element Objectives and spiral 4.2 readiness
 - SE/TE Objectives for week
 - Alignment of Week 0 and Week 2 GMD Warfighter and SE/TE run requirements to be completed by IPC
